### Deltaweld® 500

How does the MIG Welder help people?

It's a busy day at the car factory and Dave the manager wants to make more car parts each day because people are ordering cars like crazy. He orders ten more new Deltaweld welders to help. He likes the Deltaweld because they are sturdy, reliable and is easy enough for even the brand-new employees to learn. The shiny new welders are there by the end of the week. Dave and his team are able to turn out even more parts than they thought and are able to deliver cars to all of their customers on time.
